

Every enquiry deserves a next step

THE PROBLEM

Patients don't leave. They slip away between conversations.

- Enquiries wait for a reply after hours or on busy days
- Patients who don't book on the first reply never hear back
- Missed visits and recalls depend on someone remembering

WHAT PATIENTCURVE DOES

Structured WhatsApp follow-ups on the clinic's own number, using clinic-approved messages.

1

Capture

Every enquiry is answered and recorded with the patient's need, day or night.

2

Follow up

Timed follow-ups and reminders until the patient books or opts out.

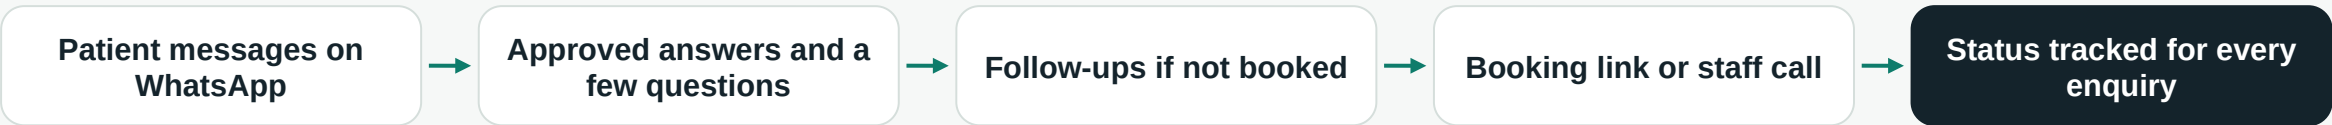

3

Recover

Missed visits and past patients are invited back; staff step in when needed.

HOW IT WORKS

WHAT CHANGES FOR THE CLINIC

No enquiry goes unanswered

Follow-up happens without staff chasing

Fewer missed bookings left unrecovered

A clear view of every patient's status

Simple pricing, clear scope

ONE-TIME SETUP

₹7,500

Pilot clinics: ₹5,000

- Onboarding call to agree workflows and timings
- Approved answers, written by us, signed off by you
- Enquiry, follow-up and reminder workflows
- Your WhatsApp Business number connected
- Staff notifications for calls and handoffs
- Team walkthrough and end-to-end testing

MONTHLY FEE

₹4,999

 a month

Pilot clinics: ₹2,999 a month

- Every enquiry answered and followed up
- Appointment reminders and missed-visit follow-up
- Recall and review requests
- Monthly enquiry-to-appointment report
- Answer updates when fees or timings change
- Hosting, monitoring and updates

SUPPORT INCLUDED

- Help on WhatsApp and phone for the doctor and team
- Issues investigated and fixed
- Changes to approved answers and rules on request

NOT INCLUDED

- WhatsApp charges set by Meta, billed at actual cost
- Software integrations, quoted separately
- Running ad campaigns

Pilot pricing applies to pilot clinics only. Taxes as applicable. Setup is payable on approval; the monthly fee is payable in advance.

HOW TO GET STARTED

1 Approve this proposal

2 Share WhatsApp access and clinic details

3 We configure and test with your team

4 Go live, with support from day one
