

Enquiry-to-appointment proposal

Prepared for Dr. Mohanapriya · Pilot customer proposal · October 2026

More follow-up. More appointments. More revenue.

Every ad enquiry managed until it becomes an appointment

Correct answers, every time

Patients only receive information you have approved: consultation types, fees, timings and address.

The right consultation, booked

Local patients go to offline consultation, patients from other towns to video, and both book into Google Calendar.

No enquiry forgotten

Everyone who doesn't book goes onto your team's follow-up list until they are recovered or closed.

PILOT PRICING

₹5,000 one-time setup

Standard ~~₹7,500~~

₹2,999 a month

Standard ~~₹4,999 a month~~

Offered to pilot customers only.

Your ads already bring about 100 enquiries a month

~3

ad campaigns a month

~100

enquiries a month

WhatsApp

where most enquiries
arrive

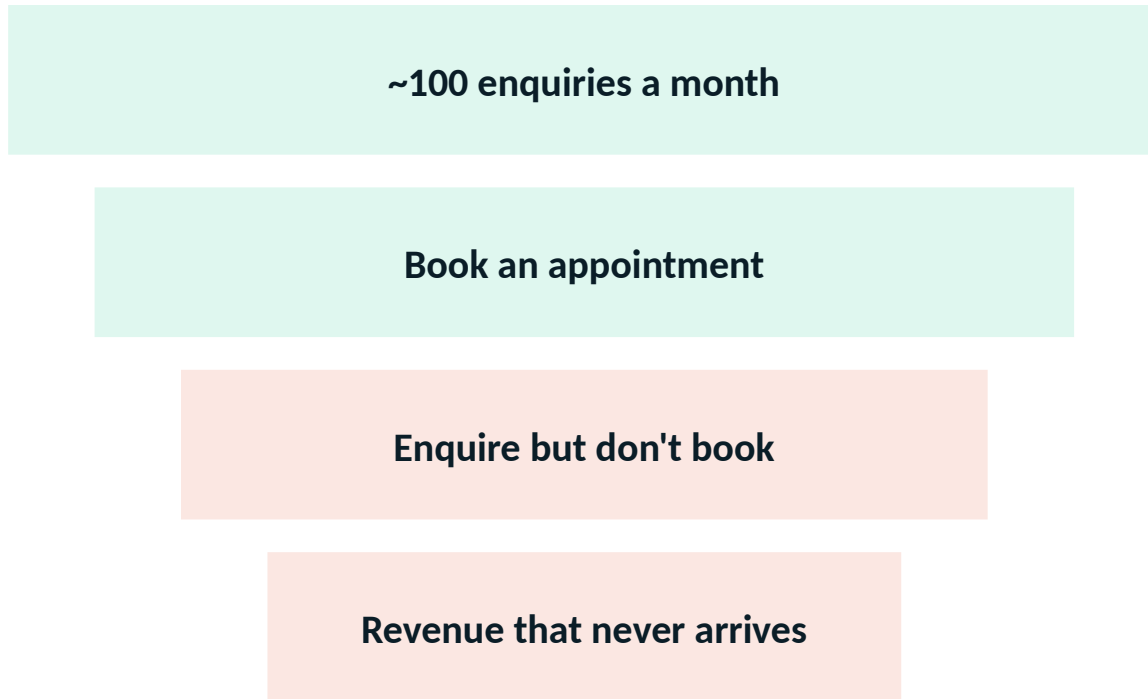

Meta AI bot

has sometimes given
patients incorrect
information

Figures shared by the clinic.

Some enquiries never become appointments

How many book and how many drop away is measured from day one.

Wrong or inconsistent answers

A patient given the wrong fee, timing or detail may not come back to check.

No clear next step

Without the patient's location and need, the right consultation isn't offered.

Non-bookers fade away

Someone who asks but doesn't book needs a call. Without a list, it depends on memory.

No view of what works

Without numbers per campaign, it's hard to see which ads pay for themselves.

One recovered patient a month can cover the fee

How the value is calculated

Value per patient

= consultation fee + (treatment rate × average treatment value)

Monthly value recovered

= enquiries not booked × share recovered × value per patient

Enquiries a month	100 (clinic)
Enquiries that book today	40% (example)
Consultation fee	₹500 (example)
Consultations that go on to treatment	50% (example)
Average treatment value	₹15,000 (example)
Non-bookers recovered	20% (example)

60

enquiries not booked a month

₹8,000

value of one booked patient

₹96,000

a month from 12 recovered patients

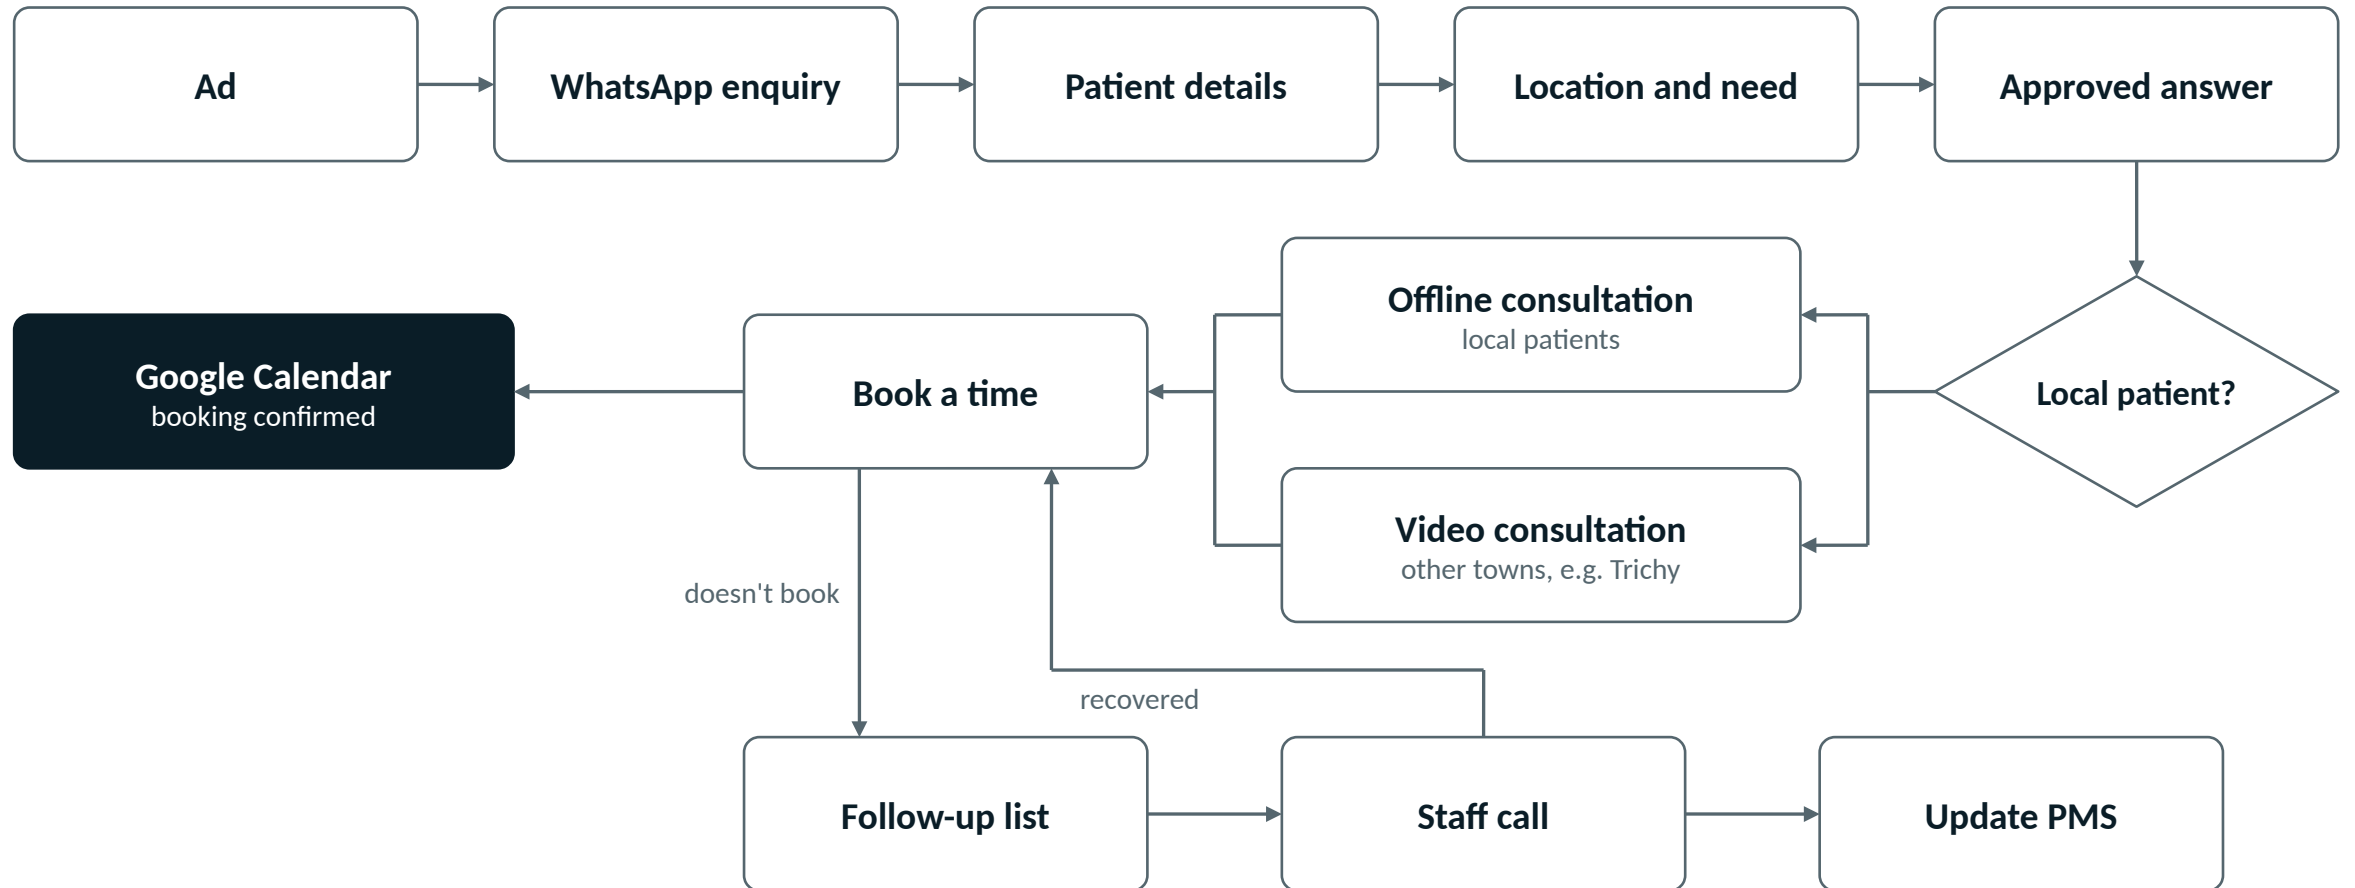

1 patient

a month covers the ₹2,999 fee

Example figures, not a forecast. We recalculate with your clinic's numbers during onboarding.

Every enquiry ends in the calendar or on the call list

Each gap has a fix and a business outcome

Area	What PatientCurve does	Business outcome
Correct information	Answers only from information the clinic approves; anything else goes to your team	No wrong fees or details reach patients
Lead qualification	Name, phone, location and requirement collected from every enquiry	Every enquiry is complete and ready to act on
Consultation routing	Local patients to offline consultation, other towns to video, each with its own fee	The right offer for each patient
Appointment conversion	Patient picks a free time; booking goes into Google Calendar with reminders	Interest becomes a booking while it's high
Staff follow-up	Non-bookers listed with their details and requirement; staff log each call	Nobody who enquired is forgotten
Patient recovery	Patients stay on the list until booked or closed	Lost enquiries become appointments
Visibility	Monthly report from enquiry to appointment	You see your conversion rate

You see your enquiry-to-appointment rate every month

Campaign	Enquiries	Qualified	Booked offline	Booked video	Recovered by staff	Conversion
Campaign 1	—	—	—	—	—	—
Campaign 2	—	—	—	—	—	—
Campaign 3	—	—	—	—	—	—

Report layout only. Figures fill in from your first month live.

Conversion by campaign

See which ads turn enquiries into appointments.

Staff recoveries

See how many patients your team won back.

Offline vs video

See how patients choose to consult.

Works with the systems your clinic already uses

WhatsApp

Where every enquiry starts, on your clinic's number.

Google Calendar

Every offline and video booking lands in your calendar.

Clinic PMS

Staff update the PMS after each call; PatientCurve tracks every follow-up. Automatic sync can be added if your PMS supports it.

PatientCurve

Connects all three and holds the enquiry, routing, follow-up list and report.

Pilot pricing, for pilot customers only

ONE-TIME SETUP

₹5,000

Standard ~~₹7,500~~

You save ₹2,500

MONTHLY FEE

₹2,999 a month

Standard ~~₹4,999 a month~~

You save ₹2,000 every month

Pilot pricing is offered only to pilot customers. Clinics that join after the pilot pay the standard price.

Not included: WhatsApp message charges set by Meta · automatic PMS sync (quoted separately) · running your ad campaigns.

What's included in setup (₹5,000, one-time)

Onboarding call

We agree consultation types, fees, timings, location and booking rules.

Approved answers

We write what patients receive; you approve every word.

WhatsApp enquiry flow

Collects name, phone, location and requirement.

Consultation routing

Local to offline, other towns to video consultation.

Google Calendar booking

Patients pick a free time; it lands in your calendar.

WhatsApp number

Your number connected, replacing the Meta AI bot.

Staff follow-up list

Every non-booker listed, with a staff chat to log calls.

Staff training

A walkthrough for your front desk.

Testing

An end-to-end test with your team before go-live.

What's included every month, and how we support you

MONTHLY FEE (₹2,999 A MONTH)

Enquiry handling Every enquiry answered, qualified and routed, at any hour.

Booking and reminders Bookings into Google Calendar, reminders before each visit.

Follow-up list Non-bookers stay listed until booked or closed.

Monthly conversion report Enquiries, bookings, recoveries and conversion rate.

Answer updates Fee, timing or information changes made for you.

Running the system Hosting, monitoring and updates.

SUPPORT

Support for you and your team Help on WhatsApp and phone for the doctor and front desk.

Problem fixing If something isn't working, we investigate and fix it.

Changes on request New questions, answers or booking rules as needs change.

Monthly review A short call on your report and agreed improvements.

Pilot input Your feedback shapes how PatientCurve develops.

What's agreed, and what we set up together

YOUR REQUIREMENTS

Journey

Ad → WhatsApp → details → location and need → correct information → routing → booking → Google Calendar.

Two consultation types

Offline for local patients, video for other towns such as Trichy.

Staff follow-up

Non-bookers listed; staff call, recover and update the PMS.

Integrations

WhatsApp, Google Calendar, the clinic PMS and PatientCurve.

SET UP WITH YOU DURING ONBOARDING

- Consultation fees and timings, offline and video
- Which towns count as local
- Booking rules: days, hours, slot length, notice
- Approved answers for the WhatsApp flow
- How patients receive and join video consultations
- Moving your WhatsApp number from the Meta AI bot

From approval to your first booked enquiry

1

Approve the proposal

Pay the ₹5,000 pilot setup fee to begin.

2

Onboarding call

Agree fees, routing, booking rules and approved answers.

3

Set up and test

We build it and test it with your team.

4

Go live

Your next campaign's enquiries run through PatientCurve.

Pilot pricing: ₹5,000 setup • ₹2,999 a month • for pilot customers only
