

PILOT CUSTOMER PROPOSAL

From WhatsApp enquiry to booked appointment

Prepared for Dr. Mohanapriya · October 2026

Bring back the patients who didn't return.

Every ad enquiry followed up until it is booked

Correct answers, every time

Patients only receive information you have approved: consultation types, fees, timings and address.

The right consultation, booked

Local patients go to offline consultation, patients from other towns to video, and both book into Google Calendar.

No enquiry forgotten

Everyone who doesn't book goes onto your receptionist's call list until they are brought back or closed.

PILOT PRICING

₹5,000 one-time setup

Standard ₹7,500

₹2,999 a month

Standard ₹4,999 a month

Offered to pilot customers only.

Your ads already bring about 100 enquiries a month

~3

ad campaigns a month

~100

enquiries a month

WhatsApp

where most enquiries
arrive

Meta AI bot

has sometimes given
patients incorrect
information

Figures shared by the clinic.

Some enquiries never become appointments

~100 enquiries a month

Book an appointment

Enquire but don't book

Revenue that never arrives

Wrong or inconsistent answers

A patient given the wrong fee, timing or detail may not come back to check.

No clear next step

Without the patient's location and need, the right consultation isn't offered.

Non-bookers fade away

Someone who asks but doesn't book needs a call. Without a list, it depends on memory.

No view of what works

Without numbers for each campaign, it's hard to see which ads pay for themselves.

How many book and how many drop away is measured from day one.

One patient brought back a month can cover the fee

Value per patient

= consultation fee + (treatment rate × average treatment value)

Revenue recovered each month

= enquiries not booked × share brought back × value per patient

Example

 Replace with your clinic's numbers

Enquiries a month	100 (clinic)
Enquiries that book today	40%
Consultation fee	₹500
Consultations that go on to treatment	50%
Average treatment value	₹15,000
Non-bookers brought back	20%

60

enquiries not booked a month

₹8,000

value of one booked patient

₹96,000

revenue recovered a month
from 12 patients brought
back

1 patient

a month covers the ₹2,999
fee

Example figures, not a forecast. We recalculate with your clinic's numbers during onboarding.

Every enquiry ends in the calendar or on the call list

Each gap has a fix and a business outcome

AREA	WHAT PATIENTCURVE DOES	BUSINESS OUTCOME
Correct information	Answers only from information the clinic approves; anything else goes to your team	No wrong fees or details reach patients
Patient details	Name, phone, location and requirement collected from every enquiry	Every enquiry is complete and ready to act on
Consultation routing	Local patients to offline consultation, other towns to video, each with its own fee	The right offer for each patient
Booking	Patient picks a free time; booking goes into Google Calendar with reminders	Interest becomes a booking while it's high
Follow-up	Non-bookers listed with their details and requirement; receptionist logs each call	Nobody who enquired is forgotten
Patients brought back	Patients stay on the list until booked or closed	Lost enquiries become appointments
Monthly report	Enquiry to appointment, for each campaign	You see your conversion rate

You see your enquiry-to-appointment rate every month

CAMPAIGN	ENQUIRIES	BOOKED OFFLINE	BOOKED VIDEO	BROUGHT BACK	NOT BOOKED	CONVERSION
Campaign 1	—	—	—	—	—	—
Campaign 2	—	—	—	—	—	—
Campaign 3	—	—	—	—	—	—

Example

Report layout only. Figures fill in from your first month live.

Brought back

Not booked

Conversion by campaign

See which ads turn enquiries into appointments.

Patients brought back

See how many patients your receptionist won back.

Offline vs video

See how patients choose to consult.

Works with the systems your clinic already uses

WhatsApp

Where every enquiry starts, on your clinic's own number.

Google Calendar

Every offline and video booking lands in your calendar.

Clinic PMS

Your receptionist updates the PMS after each call; Patientcurve tracks every follow-up. Automatic sync can be added if your PMS supports it.

Patientcurve

Connects all three and holds the enquiry, routing, call list and report.

Pilot pricing, for pilot customers only

ONE-TIME SETUP

₹5,000

Standard ~~₹7,500~~

You save ₹2,500

MONTHLY FEE

₹2,999 a month

Standard ~~₹4,999~~ a month

You save ₹2,000 every month

Pilot pricing is offered only to pilot customers. Clinics that join after the pilot pay the standard price.

Not included: WhatsApp message charges set by Meta · automatic PMS sync (quoted separately) · running your ad campaigns.

WHAT'S INCLUDED

Setup: ₹5,000, one-time

Onboarding call

We agree consultation types, fees, timings, location and booking rules.

Approved answers

We write what patients receive; you approve every word.

WhatsApp enquiry flow

Collects name, phone, location and requirement.

Consultation routing

Local to offline, other towns to video consultation.

Google Calendar booking

Patients pick a free time; it lands in your calendar.

Your WhatsApp number

Connected to the new flow, replacing the Meta AI bot.

Call list

Every non-booker listed, with a staff chat to log calls.

Receptionist training

A walkthrough of the call list and call logging.

Testing

An end-to-end test with your team before go-live.

Every month: ₹2,999, with support

MONTHLY FEE

Every enquiry handled Answered, qualified and routed, at any hour.

Booking and reminders Bookings into Google Calendar, reminders before each visit.

Call list Non-bookers stay listed until booked or closed.

Monthly report Enquiries, bookings, patients brought back, conversion rate.

Answer updates Fee, timing or information changes made for you.

Running the service Hosting, monitoring and updates.

SUPPORT

Help for you and your team On WhatsApp and phone, for the doctor and the receptionist.

Problem fixing If something isn't working, we investigate and fix it.

Changes on request New questions, answers or booking rules as needs change.

Monthly review A short call on your report and agreed improvements.

Pilot input Your feedback shapes how Patientcurve develops.

What's agreed, and what we set up together

YOUR REQUIREMENTS

Journey

Ad → WhatsApp → details → location and need → correct information → routing → booking → Google Calendar.

Two consultation types

Offline for local patients, video for other towns such as Trichy.

Follow-up

Non-bookers listed; your receptionist calls, brings them back and updates the PMS.

Integrations

WhatsApp, Google Calendar, the clinic PMS and Patientcurve.

SET UP WITH YOU DURING ONBOARDING

- Consultation fees and timings, offline and video
- Which towns count as local
- Booking rules: days, hours, slot length, notice
- Approved answers for the WhatsApp flow
- How patients receive and join video consultations
- Moving your WhatsApp number from the Meta AI bot

From approval to your first booked enquiry

1

Approve the proposal

Pay the ₹5,000 pilot setup fee to begin.

2

Onboarding call

Agree fees, routing, booking rules and approved answers.

3

Set up and test

We build it and test it with your team.

4

Go live

Your next campaign's enquiries run through Patientcurve.

Pilot pricing ₹5,000 setup · ₹2,999 a month · for pilot customers only

Bring back the patients who didn't return.
